Name: _____

Your thesaurus contains words for many overused words. Try to "bury" these words when you are writing and use a synonym instead to brighten your writing.

Here are some hints:

- Use a highlighter to highlight words in your thesaurus that you love to use in your writing so that they are easy to find.
- Any time that you read or hear a word that impresses you, write it under your WOW words and try and use it in your next story.
- As you edit your writing, if there is a word you use a lot, write it in a blank box and look up synonyms for this word. Try and use the synonyms in your writing.
- If you find a synonym for a word that is not listed in your thesaurus, add it on the blank lines.
